## Safety device (with dust filter): ESFN-20

## Type ESFN-20 for protection of Tapping Points and Distribution Lines

The safety device ESFN-20 according to DIN EN ISO 5175-1:

- avoids dangerous gas mixtures by a gas non-return valve (NV)
- stops flashback through flame arrestor (FA)
- a temperature-sensitive cut-off valve stops the gas flow when a predetermined temperature is exceeded (TV)
- a dust filter protects the gas non-return valve against contamination
- every safety device is 100% tested
- all metal components in brass 2.0401 / spring 1.4310

## Safety elements of the IBEDA Safety device ESFN-20:

- NV Gas non-return valve
- FA Flame arrestor
- TV Temperature-sensitive cut-off valve

## Additional features:

DF Dust filter

### Maintenance:

The safety devices are to be tested by a qualified and authorised person at regular intervals according to country specific regulations. The safety device is to be tested for gas tightness, gas flow and gas return at least once a year.

We would be pleased to offer you the flashback arrestor testing unit model PVGD.

It is not allowed to open the safety devices.

pv = Primary pressure

ph = Secondary pressure

∆p = Primary pressure minus Secondary pressure

## **Conversion Factors:**

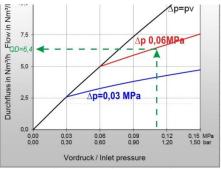

0,1 MPa = 1 bar = 100 kpa = 14,504 psi

 $1 \text{ m}^{3}/\text{h} = 35,31 \text{ cu ft/h}$
