

# Coupling pin: N2

## Type N2 for tapping point or in-hose

The coupling pin N2:

- no mixing up by different coding of coupling pins
- prevents accidental disconnection
- All metal components in brass 2.0401

## Safety elements of the IBEDA coupling pin N2:

coding of coupling pins

### Maintenance:

Couplings are wearing parts and have to be tested by a qualified and authorised person (at least once a year). The tests have to be performed when the couplings are connected as well as disconnected.

Leakage tests are to be performed with inert gas or air (free from oil and grease) or the operating gas.

It is not allowed to open the quick-action couplings.
